PROFILE SUMMARY

Senior Unity Game Developer and Systems Engineer with 15+ years of software engineering experience delivering full-stack solutions on web and mobile. Demonstrated leadership in guiding cross-functional teams, optimizing development pipelines, and implementing robust system architectures that enhance efficiency, reliability, and user experience. Strong commitment to continuous learning and high-quality engineering.

CORE EXPERTISE

- Unity 3D, C#, C++.
- Python, Node.js, Javascript, Typescript.
- Mobile Development (Android, iOS).
- AWS, Docker, PostgreSQL, MongoDB.
- Agile (SCRUM, Kanban), Team Management.

PROFESSIONAL EXPERIENCE

Remote – Asunción, Paraguay

Freelance Systems Engineer – 07/2025 – current

- Committed to continuous learning and upskilling to stay aligned with evolving industry standards, actively investing in professional growth through ongoing training and self-directed study.
- Expanded professional portfolio with new game development prototypes, tools, and technical demonstrations showcasing modern engineering practices.

Posibillian Tech S.A. – Asunción, Paraguay

Team Lead Game Developer – 03/2022 – 06/2025, 3 years 3 months

- Led cross-functional teams of 6 developers to deliver large-scale mobile game used in over 35 countries.
- Optimized performance for mobile cross-platforms, reducing app size by 25%.
- Developed a custom PSD importer to accelerate Asset integration from 8 hours to 10 minutes, increasing workflow efficiency.
- Mentored developers on SOLID principles, Clean Code, and Design Patterns, raising code quality and team skill levels.

Remote – Asunción, Paraguay

Freelance Systems Engineer – 06/2018 – 02/2022, 3 years 8 months

- Developed custom Odoo payment modules and deployed solutions using Docker, AWS and microservices increasing profit by 25%.
- Automated data transformations from Excel/CSV to ERP systems, reducing manual errors and processing time by 60%.
- Delivered scalable software solutions for SMEs using a wide range of technologies, improving system reliability and accelerating feature delivery.

Innovation Center in Computer Engineering, Itaipu Technological Park (PTI) – Paraguay

Lead Systems Engineer – 05/2015 – 05/2018, 3 years

- Developed a Knowledge Management System for ITAIPU Binational, cutting training time by 40%.
- Developed a high-performance 3D Web UI, resulting in a significantly more engaging user experience and increasing user retention by over 25%.
- Led R&D initiatives in Augmented Reality and 3D simulation technologies, driving innovative prototypes and accelerating feature validation cycles by more than 20%.

Eiru Software – Paraguay

Lead Developer / Project Manager – 06/2014 – 05/2015, 1 year

- Built and trained a new team from the ground up in Odoo technologies, accelerating onboarding and boosting team productivity by over 40%.
- Designed a comprehensive installation guide for GNU/Linux servers with Odoo preconfigured, automating the setup with custom scripts and reducing deployment time by 30%.
- Designed and implemented automated backup and RAID systems to enhance data security, increasing reliability and reducing recovery time by over 40%.

Polytechnic School, National University of the East (UNE) – Paraguay

IT Infrastructure Administrator – 09/2006 – 12/2014, 8 years 4 months

- Managed Linux and Windows servers, optimized network infrastructure, and executed data recovery operations, reducing system incidents by over 40% and enhancing overall operational stability.
- Provided user support and system maintenance across the university's IT infrastructure, reducing recurring technical issues by 60% and improving overall service reliability.

EDUCATION

- UFPR (Brazil) – Specialist in Numerical Methods in Engineering (2018).
- National University of the East (Paraguay) – Systems Engineer (2014).

CERTIFICATIONS

- Scrum Course. ScrumStudy (2019)
- Unity Certified Associate (2019)
- Dale Carnegie Leadership (2018)
